PIONEERING GLOBAL BRAND IN THE ARMS SECTOR

Nurtured through its roots spread out over three discrete centuries, targeting ever higher without limits, setting forth future trends by means of its innovative approach; a brand generating quality and value through perfection based on engineering success.

Sarsilmaz is at present a brand realizing exports to more than 80 countries, its models which exceed the number of 300 are preferred by military and police forces as well as civilian users in a lot of countries worldwide, particularly in Türkiye.

By subscribing to several initials and numerous achievements in its past history in excess of one hundred years, Sarsilmaz became at all times the pioneering and innovative brand of Türkiye.

The first step taken at Elazığ in 1880 was the start-up of a trip arriving at and meeting Istanbul in 1956. Such long lasting trip merged with an innovative approach and created a brand in possession of Europe's largest integrated arms manufacturing facility.

Sarsilmaz is positioned today amongst the leading producers worldwide thanks to its wide range of products that could meet all requirements of a military unit, from heavy machine guns to cannons and from pistols to sports weapons.

This success is supported in the background by an approach bringing together innovative production processes and quality, corporate organizational structure with customer satisfaction, innovative design and manufacturing processes with R&D activities of the future.

Leading in its field at all times ever since 1880 up to the date of the present day, Sarsilmaz is ongoing with its such mission upon developing its production processes in compliance with contemporary requirements and making the same compatible to "Industry 4.0".

Now, we are faced with a new pathway; developing products that would meet the requirements of both the present as well as the future via robotics and software technologies, taking our global recognition the topmost level and thus becoming one of the brands of the defense industry having a word at the international scale.

While gaping apart the gateways of sustainable production not solely through our products but via our manufacturing processes as well, we are focusing on the welfare and merriment of our customers and employees alike. We are adapting the trust and confidence acquired through our past history and experiences, to the defense technologies of the future by means of our innovative R&D operations.

1880

Sarsilmaz was established by Abullatif Bey in Elazig. The company began its work with the production and repair of flintlock rifles.

1923

Abullatif Bey passed away. From this date, Sarsilmaz continued its activities under the direction of Abullatif Bey's son Mustafa Alis.

1956

A second generation took place in Sarsilmaz. Mustafa Alis, who passed away, was replaced by his son Sarsilmaz The headquarters of the company under the management of Sarsilmaz Alis moved to Istanbul.

1957

Sarsilmaz started its work in Istanbul by trading products from manufacturers around Düzce and abroad.

1970

Sarsilmaz established its first production facility and became one of the manufacturers in the arms sector.

1990

Sarsilmaz made a new breakthrough and decided to manufacture pistols as well as sports weapons.

2000

As Sarsilmaz experienced a third-generation change, Latif Aral Alis took over as chairman of the board of directors.

2007

Another decision that will be decisive for the future has been taken and work has begun to establish an R&D center.

2015

Sarsilmaz has succeeded in becoming the first R&D center in its field, certified by the Ministry of Science, Industry and Technology.

2020

SAR9, which is the leader of the "original domestic pistol Development Project" in Turkey, was entitled the "Editors 'Choice" and "Readers' Choice" awards in the United States and selected as the "best pistol of 2020".

MILITARY & LAW ENFORCEMENT

As one of the most established companies in Turkey, Sarsilmaz transfers its experience gained over a hundred years in the arms industry to the projects developed by it in the field of defense industry. Sarsilmaz, Turkey's leading authority in weapons technology, utilizes its superior domestic research and design engineering expertise to develop weapons not only for use by the Turkish Armed Forces, but for use by forces around the world who recognize Sarsilmaz' world-class manufacturing technology. Sarsilmaz, which has a wide range of products from pistols to submachine guns, from infantry rifles to machine guns, makes an important contribution to Turkey's defense industry by improving its manufacturing quality every day.

MILITARY RIFLES

The projects carried out by Sarsilmaz to meet the critical needs of domestic security forces include the machine gun projects SAR 762 MT and SAR 127 MT. In addition such projects, a wide range of military weapons of Sarsilmaz company include the machine guns TE 54 and SAR 109T, infantry rifles SAR 223P, SAR 56, and MPT-76 SH, as well as 9x19 millimeter duty gun SAR9 Mete, which completed the testing phase of the Defense Industry Presidency’s “Original Domestic Gun Development (ÖYTG) Project” by far in first rank.

SUB MACHINE GUNS

The sub machine gun family included in the product range developed by Sarsilmaz in the field of defense industry and military weapons consists of the versions of the TE 54 and SAR 109 series to meet different needs. The sub machine guns, which are developed in accordance with NATO standards using completely domestic design and engineering, are in the inventory of Turkish Armed Forces, Gendarmerie General Command and Turkish Police as well as law enforcement forces of various friendly countries.

INFANTRY RIFLES

As Sarsilmaz’s infantry rifles developed as a result of intensive R&D activities and cooperation established with universities, the SAR 223 series consists of MPT-76 SH and SAR 15T. These weapons, which have effective firepower and range, and a high percentage of hit, have the features that will enable them to operate most efficiently in the most difficult terrain and climatic conditions.

MACHINE GUNS

The machine guns SAR 762 MT and SAR 127 MT, which are developed locally as a result of intensive R&D activities by using advanced technology, constitute the flagships of Sarsilmaz company in the field of military weapons. Both projects developed under the leadership of the Defense Industry Presidency of Turkey respond to the needs of a unique heavy machine guns.

SAR 109T

SAR 109T designed originally by Sarsilmaz for residential use stands out with its lightness and ease of use. SAR 109T, which offers a highly effective use through to its high speed operation capacity, also enables the use of all kinds of accessories that may be needed in the battlefield with its modular body structure designed according to NATO standards. SAR 109T, which operates with the sudden blowback system, can make approximately 900 shots per minute while using 9x19 millimeter ammunition. A machine gun that can feed ammunition with a magazine with a capacity of 10, 20 or 30 rounds has a dioptic (50 - 100 m), foldable and adjustable mechanical sight that enables fast aiming. Furthermore, the length-adjustable telescopic butt stock reduces muzzle rise by transmitting the recoil directly to the shoulder with its linear structure. The SAR 109T, which is used actively by the Turkish Armed Forces, Gendarmerie General Command and General Directorate of Security in the field, also has a version with its carrying arm.

SAR 56

Sarsilmaz company combined the experience gained from SAR 223 developed series originally and the mass production MPT-76 SH infantry rifles with SAR 56 series. SAR 56 series, which emerged as a result of blending the experiences with the feedback received from the personnel in the field, draws attention with its user-friendly and ergonomic structure. While SAR 56 series offers high performance with its short stroke gas piston drive system and a diameter of 5.56x45mm, it also provides easy handling with its five-position and cheek-supported butt. This ergonomic structure of SAR 56 series is reinforced by its long and detachable stock as well as a supported hand grip. SAR 56 series, which can be secured when it is not installed, prioritizes security and has a structure compatible with tactical use with its double-sided latch group. Polymer dust cover, ergonomic sling attachment ring, indicator magazine are among the other important features of SAR 56 series. This high-tech assault rifle is also available in different barrel lengths. SAR 56 series, which offers three different barrel length alternatives as 7.5in., 11in. and 14.5in., can adapt to all missions that can take place in different conditions, from close to far range.

SAR 15_T

The SAR 15T is a 100% locally manufactured version of the legendary AK-47 platform, modernized with upper case, lower and upper fore-end picatinny rails. The SAR 15T, which is currently in use by the Turkish Armed Forces, stands out as a much lighter infantry rifle than its competitors, while also displaying a modern look with its high-strength polymer magazine, stock, and fore-end reinforced with steel parts.

With its 5-stage folding telescopic stock and superior performance in all climatic conditions, the SAR 15T provides its user with the advantage of comfortable carrying. This legendary infantry rifle, with a caliber of 7.62x39 millimeters and a gas piston driven system, offers single and serial shooting options.

SAR 308

SAR 308 series is a 100 percent locally produced and modernized version of the legendary AK-47 platform. SAR 308 Version 2, stands out as a much lighter infantry rifle, while it displays a modern appearance with its high-strength polymer magazine reinforced with steel parts, butt and stock. SAR 308 Version 2, which exhibits a superior performance in all climatic conditions, offers single and

serial shot options together. SAR 308 Version 2, like the first version, provides the user with the advantage of comfortable carrying with its folding telescopic butt stock option as well as the fixed stock. With a 7.62x39mm caliber, this legendary assault rifle offers 650 rounds per minute and a muzzle velocity of 680m/s while it operates with a gas piston-driven system.

MPT 76 SH

Modern infantry rifle of the Turkish Army, MPT-76 SH is renamed as MPT-76 SH after it is lightened about 470 g by Sarsilmaz using completely national resources and by being loyal to performance criteria by Turkish engineers and technicians. MPT-76 SH, which uses 7.62x51 mm ammunition in NATO standards, is fed by a 20-zcartridge capacity magazine. MPT-76 S, which can achieve 700 rounds per minute and 800 metres per second muzzle velocity, can also be improved with all kinds of accessories by means of its modular railed handguard.

SAR 556 MT

Designed using advanced engineering and prioritizing ergonomics in order to meet Türkiye's need for light machine guns with completely domestic capabilities, the SAR 556 MT light machine gun has been developed for both infantry and platforms. Thanks to its quick-change barrel mode (QCB), the SAR 556 MT eliminates the need for high firepower and has a body capable of firing at least 50,000 rounds. The light machine gun, which can fire continuously at temperatures between -42°C and +71°C, can effectively fire at targets between 300 and 1000 meters with 8- position mechanical sights. The SAR 556 MT also offers 6 different height settings in the cheek rest system on the adjustable 5-position buttstock, which improves shooting ergonomics. Equipped with a hydraulic buffer system that minimizes the recoil force in order to provide the user with more comfortable shooting, the SAR 556 MT features an open trigger system with a gas-driven operating principle that provides the best results in semi-auto and full auto firing. The SAR 556 MT is available in two different models: the SAR 556 MT-T, which features only a linked belt feed system, and the SAR 556 MT-T, which features both a magazine and linked belt feed system.

Accessories not included

MIL-STD-1913 Picatinny rail for easy accessory integration on the handguard and top cover

SAR 56 HMT

Designed using advanced engineering and prioritizing ergonomics in order to meet Turkiye's need for machine guns with completely domestic capabilities, the SAR 56 HMT meets the need for high firepower at the maximum level thanks to its quick-change barrel mode (QCB). The machine gun, which can fire continuously at temperatures ranging from -42°C to +71°C, has an average effective range of 600 meters and a 5-position adjustable stock, providing superior success in all kinds of challenging missions. The SAR 56 HMT's cheek rest system features six different height adjustments, maximizing the infantryman's ergonomic advantage. The SAR 56 HMT ensures a perfect harmony with the user and guarantees superior performance with its buffer system that minimizes recoil force. The SAR 56 HMT offers a technical infrastructure that is both reliable and highly efficient with its trigger safety and gas piston-driven open system operating principle, which enables rapid firing. The MIL-STD-1913 Picatinny rails on the handguard and upper cover, which facilitate accessory integration, the detachable barrel and the magazine or belt feed alternatives make the SAR 56 HMT an advanced and highly deterrent firepower in its segment.

SAR 762 MT

SAR 762 MT series, which is manufactured by completely domestic design and engineering to meet Türkiye’s machine gun needs, is developed for both infantry and onboard use. SAR 762 MT series, which offers more shots with its quick barrel changeover feature, has at least 50 thousand shots of body and a barrel life of 25 thousand shots. The weapon, which can operate in temperatures between -42°C and +72°C, reaches 1,200m for regional targets. The maximum range of SAR 762 MT is 3,725 m. There are five different models of the machine gun with an open position/gas-driven assembly. While SAR 762 MT A series can be used in remote controlled weapon systems, SAR 762 MT C series can operate as a coaxial machine gun with the main weapon in the Cobra, Ejder Yalçın, Amazon, Kirpi, Vuran vehicles. SAR 762 MT B series developed for infantry use can be fired on both fork legs and tripods.

SAR 762 MT-A is an ideal solution for remotecontrolled weapon stations and unmanned ground vehicles.

SAR 762 MT-B was developed to replace older machine guns in infantry units.

SAR 762 MT-C, can be used in remote controlled weapon systems.

SAR 762 MT-D can be used in single and serial action mode.

SAR 762 MT-E was produced with cerakote coating to serve in naval platforms.

SAR 127 MT

CONTINUOUS FIRE POWER

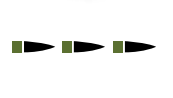

ON LAND, AIR AND SEA

The heavy machine gun SAR 127 MT, which is manufactured to provide the strong fire support needed in the combat environment, has the ability to operate fully automatically and fire one by one. The weapon can also be easily adapted to the structure of the remote controlled systems in which it is integrated or the position where it is placed, thanks to the ammunition supply, which can be made from the right or left. The effective range of SAR 127 MT series, which can be mounted on land, sea and air vehicles by making the necessary interface connections and weighs approximately 38 kilograms, can reach 1,830m, while its maximum range reaches 6,764m. The barrel of the air-cooled gun can be changed quickly. This feature allows the weapon to continue the battle without sacrificing its firepower in situations that require continuous fire pressure.

FROM TR MEKATRONİK, THE SUBSIDIARY OF

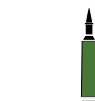

SARSILMAZ & TURKISH AEROSPACE:

12.7 HÜRKUŞ POD SYSTEM

SAR 127 MT_{AIR}

SAR 127 MT Air, as the version of SAR 127 MT developed for being integrated on aircraft platforms, entire technical data package prepared by Sarsılmaz and characterized as the heaviest caliber gun of Türkiye, developed and manufactured by local and national means, has been designed to ensure powerful airborne firing support with range of up to 7 km and effective 1.8 km. This 12.7 x 99 millimeter caliber, NATO-standard gun is mounted on the Hürkuş-C in a special pod developed by TR Mekatronik, which was established in partnership with Sarsılmaz-TUSAŞ. SAR 127 MT Air incorporates higher shooting capacity

compared to the surface version thanks to its fixed barrel equipped with rapid cooling elements and lightened inner parts. SAR 127 MT Air is capable of firing 900-1250 shots per minute through mayon (ammunition belt) feeding system. This heavy machine gun with a barrel leaving speed of 890 m/s is differentiated from other versions with a maximum length of 1610 millimeters, 915 millimeters barrel length, height of 160 millimeters and weight reduced down to 33 kilograms, thereby taking airborne support to the most powerful level.

PISTOLS

Türkiye's firearm brand favored throughout the world, Sarsilmaz manufactures over 20 pistol models with its almost hundred-and fifty years' experience. Offering the same quality standard to its customers in all of its products, Sarsilmaz combines polymer and steel frame options with reliability, performance and practical use advantages in affordable prices while generating different solutions for different needs with its broad product range. Sarsilmaz pistols which are developed completely with local design and production principle give perfect results in professional, personal or competition use.

POLYMER FRAMED PISTOLS

Sarsilmaz's state of the art reinforced polymer framed pistol models meet user's needs for both professional and personal. Competition purposes. Sarsilmaz polymer framed pistols including the B6 series and the SAR9 family, winner of Turkey's "Authentic Domestic Pistol Project program, offer safe and easy use and many accessory options."

POLYMER FRAMED PISTOLS

Developed with completely domestic design and production principles, Sarsilmaz pistols give excellent results in professional, personal or sports use.

SINGLE ACTION TRIGGER SYSTEM

It is a system that works by releasing the front trigger system with the force applied to the trigger of the firearm.

SAR9 SPORT GEN3
Barrel:133.5 mm

SAR9 GEN3
Barrel:113.5 mm

SAR9 C GEN3
Barrel:103.5 mm

SAR9 SC GEN3
Barrel:85 mm

DOUBLE ACTION TRIGGER SYSTEM

It is a system that works by first cocking and then releasing the system at rest thanks to the force applied to the fire system trigger. SARSILMAZ SAR9 family operates on the principle of single action, while the B6 series operates on the principle of double action.

B6
Barrel:116 mm

ENHANCED FEATURES

- 1 Safety catch suitable for right and left hand use
- 2 Replaceable magazine release suitable for right and left hand use
- 3 Replaceable side plate and back straps
- 4 Picatinny rail system
- 5 Firing pin cocked indicator
- 6 Trigger safety
- 7 Hologram sight
- 8 Silencer connection
- 9 Cooling channels
- 10 17 / 19 Magazine capacity
- 11 Cerakote® coating
- 12 Firing Pin Retainer
- 13 Ergonomic Hammer
- 14 New type of precision and flat trigger
- 15 Firing Catch steel back slide
- 16 Aluminium Sport trigger
- 17 Fiber optic rear - sight
- 18 Optic slide plate

SAR9 GEN3 FAMILY

SAR9 GEN3

SAR9 Gen3, the newest and most advanced technology generation of SAR9 series, offers users a brand-new experience with its design and engineering features. Among the third-generation models of SAR9, SAR9 Gen3 has a structure that combines Sarsilmaz's expertise in polymer bodies, stainless cartridges, as well as high-alloy steel barrels and TAP slides at the most advanced level. Additionally, SAR9 Gen3 features interchangeable grip panels and backplates, a manual safety mechanism (excluding SAR9 C), and a status indicator, along with a picatinny rail system that perfectly accommodates a wide range of accessories enabling customization. SAR9 Gen3 enhances extensive safety features by integrating a trigger safety, half-cocked system, and a body safety to an advanced level. Its 18-degree grip angle and a tap slide designed to facilitate cocking ensure SAR9 Gen3 can be used comfortably even under challenging conditions. SAR9 Gen3 combines durability and precision, making aiming easier than ever with a 90-degree trigger break angle, shortened trigger path, and enhanced trigger sensitivity. Developed to provide maximum performance in rapid consecutive firing, its broad and numerically more cooling channels enable barrel cooling from various angles. SAR9 Gen3 also enriches the advanced features with a red dot option compatible with the mechanical sight line. SAR9 Gen3, with a caliber of 9 mm, has a total length of 193 mm, a width of 36 mm, and a weight of 760 grams, offering ease of carrying and use; it comes with options of 15, 17, and 19 round magazines.

SAR9C GEN3

Amongst third-generation SAR9 models, SAR9C Gen3 stands out for offering a perfect balance, possessing all the advantages and benefits of micro- and full-sized pistols. SAR9C Gen3, with its small and lightweight design, provides its user with easy carrying and flawless concealment means, while fully maintaining the capacity and performance expected from full-size pistols. SAR9C Gen3 features interchangeable backstrap and grip panels, a stainless steel cassette, high-alloy steel barrel and slide, a polymer frame, and a 15-round magazine capacity. Additionally, this model incorporates all the details of the third-generation SAR9 technology, further to its light-weight and compact structure. Like all Gen3 models, SAR9C Gen3 offers trigger safety, a pre-cocked system, and an integrated body safety, and it is equipped with a picatinny rail system that allows perfect compatibility with all types of accessories. SAR9C Gen3, with its 18-degree grip angle and upper slide tap designed to facilitate cocking/setting, adapts well to the most challenging conditions. Like other Gen3 models, SAR9C combines a 90-degree trigger break angle, shortened trigger path, and enhanced trigger sensitivity in a compact body. SAR9C Gen3, measuring 183 mm in total length and a body weighing 745 grams, accommodates a 15-round magazine and a wide range of accessories.

SAR9T C GEN3

Gizli taşıma için özel olarak geliştirilen SAR9T C GEN3, Sarsılmaz'ın polimer gövde ve çelik namlu uzmanlığını kompakt bir tasarımda buluşturuyor. SAR9T C GEN3, taktik ışık ve lazer gibi uluslararası standartlarda aksesuar entegrasyonunu sağlayan Picatinny ray sistemiyle kişisel kullanım ihtiyaçlarına kusursuz bir şekilde yanıt verirken, hafif ve dayanıklı yapısıyla rahat taşıma kolaylığı sağlıyor. Yoğun atışlarda namlunun atış stabilizasyonunu korumayı destekleyen ve sürdürülebilir atış konforuna yardımcı soğutma kanallarına sahip aynı zamanda optik nişangah uyumlu kapak tasarımı, günümüz dinamiklerini bünyesinde barındıran SAR9T C GEN3'ün atış hassasiyetini artıran özellikler arasında. Kompakt tasarıma sahip olmasına rağmen bastırıcı/susturucu takılmasına olanak sağlayan namlu tasarımı SAR9T C GEN3'ün diğer bir ayırt edici özelliği olarak ön plana çıkmaktadır. Keskin hatlara sahip kapak çizgileri kolay kurulum ve söküm avantajı sunarken, değiştirilebilir arka sırtlık ve yan kapaklar SAR9T C GEN3'e ergonomik kullanım özellikleri kazandırıyor. SAR9T C GEN3, güvenilirliği, performansı ve kompakt tasarımıyla gizli taşıma için ideal bir seçenek sunuyor

SAR9 SPORT GEN3

The sporty member of the Gen3 series, SAR9 Sport Gen3, elevates to a new level the standards of its segment with its exceptional performance. Incorporating all the features of Gen3 technology, SAR9 Sport Gen3 showcases a perfect blend of a longer forged steel slide and high alloy steel barrel with an ultra-light polymer frame. Like other Gen3 models, it features advanced design and engineering capabilities including a trigger safety, a pre-cocked system, and a frame safety. SAR9 Sport Gen3 maintains safety as a priority by means of a manual safety and a status indicator, while making aiming easier than ever with a 90-degree trigger break angle, shortened trigger path, and enhanced trigger sensitivity. The sporting advantages offered to the shooters by SAR9 Sport Gen3 include a picatinny rail system compatible with all accessories, an 18-degree grip angle for superior control, a supporting upper slide, a wide and numerically superior cooling channel developed for maximum performance in rapid consecutive firing, a lower compensator channel that minimizes recoil and muzzle rise, and a mechanical sight line compatible with advanced reddot options. The 9mm caliber SAR9 Sport Gen3 offers bullet magazine options of 15, 17, and 19 rounds.

 SARSILMAZ

SAR9 SC GEN3

Kompakt tasarım, üstün performans ve güvenliği bir araya getiren SAR9 SC Gen3, gizli taşıma için ideal boyutlarıyla güçten ödün vermeden maksimum konfor sunuyor. Hızlı ve hassas atışlar için mükemmel tetik kontrolü sağlayan 90° düz tetik tasarımı kullanım sırasındaki riskleri minimuma indirirken, güçlü hatlar ve ergonomik detaylarla zenginleştirilen kapak tasarımı ise son derece pratik bir kurma deneyimini mümkün kılıyor. SAR9 SC Gen3'ün üstün performansında önemli rol oynayan özel tasarım soğutma kanalları, namlunun ısınmasını önlerken seri atışlarda stabilite sağlıyor. SAR9 SC'nin 3. jenerasyonunda özellikle üstünde durulan red-dot nişangah uyumu, hedef almayı hiç olmadığı kadar hızlı ve kolay bir hale getiriyor. Önemli güvenlik geliştirmelerine sahip olan SAR9 SC Gen3'ün dik tetik korkuluğu ise rahat ve güvenli bir atış deneyimi sağlıyor. SAR9 SC Gen3 ayrıca her türlü aksesuar entegrasyonunu mümkün kılan picatinny ray sistemi, ergonomik tutuşu artıran parmak destekli şarjör alt kapağı ve 15 ila 17 kapasiteli şarjör seçenekleriyle geniş bir kişiselleştirme olanağı sunuyor.

SAR9T SC GEN3

The SAR9 T SC Gen3, one of Sarsilmaz's new generation models, offers an highly comfortable use with its finger-supported magazine and polymer frame that provides maximum grip comfort. Offering advanced advantages despite its compact design, the SAR9T SC Gen3 has a picatinny rail design that perfectly fits accessories such as flashlights and laser pointers. The SAR9T SC Gen3 prioritizes user safety with a square trigger guard that facilitates accessory mounting while increasing grip comfort, as well as a safe flat trigger design that seamlessly combines precision and performance. The SAR9T SC Gen3's slide design, which is suitable for optical mounting and has innovative lines that facilitate slide manipulation, maximizes RMsC red-dot compatibility, a sought-after feature of the subcompact segment. The SAR9T SC Gen3 can be used with mechanical sights with its co-witnessed front sight system and customizable dovetail front sight mount. The SAR9T SC Gen3 also stands out with its barrel design that allows suppressor/silencer integration.

SAR9 SOCOM

Sarsilmaz's new model SAR9 SOCOM, which is preferred by law enforcement agencies in the United States, offers a professional user experience with its full-size carry features and design suitable for competition use. The innovative magwell design, which facilitates magazine changes during firing, increases the comfort of the SAR9 SOCOM's grip and maximizes pistol control. Thanks to its slide design with co-witness feature, SAR9 SOCOM offers the opportunity to use with red-dot as well as optic-ready mechanical sights. The picatinny rail system suitable for accessory integration (flashlight, laser pointer, etc.) in international standards and the flat trigger design with a single-action feature that improves shooting performance maximizes the target success of the SAR9 SOCOM. The slide design of the SAR9 SOCOM provides a high level of user comfort thanks to the increased cooling channels to prevent overheating during continuous firing, and the disassembly catch that facilitates slide tool removal.

SAR 2023

SAR 2023 specially developed by the engineers of Sarsılmaz in commemoration of and honoring the 100th Anniversary of the Republic of Türkiye, possesses a substantial value worth for collection thanks to its limited number of production. This pistol enriched by design elements symbolizing history of the Turkish Republic affluent with successes while stepping ahead in her second centennial as well as future targets and objectives, presents an attractive outlook to this end. Where quality, innovation and performance are foremost, SAR 2023, 9x19 mm caliber semi-automatic pistol is ready at all times for a superior shot thanks to its ergonomic holster form, front as well as rear notches on the slide designed to make it ready for shooting in an easy and rapid manner. By means of its magazine option of capacity holding 15 to 17 bullets and weight of only 730 grams, introducing an optimum solution for those in search of a reliable and light-weight pistol, SAR 2023, while enabling the user a faultless shooting sensitivity thanks to its reduced reset distance by means of its 90-degree special design sports trigger, also provides for faster and more accurate repeated shots. Whereas cooling ducts of SAR 2023 on the cover enable faster cooling of the barrel particularly following serial shots, reducing recoil substantially. Thanks to the picatinny rail system, SAR 2023 compatible to all kinds of accessories with ease, is at the same time a multi-faceted pistol facilitating usage of reddot. Its ergonomic form and interchangeable backrest feature at sizes "M" and "L" are amongst other advantages of SAR 2023. SAR 2023, besides and further to its technical characteristics, is in possession of an appearance befitting the 100th Anniversary of the Turkish Republic by means of its attractive design elements as well. SAR 2023 saluting the second centennial of our Republic by the special 100th Anniversary Logo on the cover and also such golden marking elements enriched by the same 100th Anniversary Logo, is further emphasizing the targets towards the future via its energetic outlook.

SAR9_{SC}

Designed in sub-compact class, providing its user with professional as well as practical usage by means of its 12 / 15 / 17 bullet capacity and weight of 630 grams. Besides its compatibility with all magazines under SAR9 family, SAR9 SC designed for minimum rearing, and rapid shooting, is re-specifying World standards towards concealed usage thanks to its barrel length of merely 85 millimeters. The pistol incorporating fiber optic rear-sight fore-sight and aligner is focusing on security similar to all other guns of the SAR9 family. Of particular attraction due to its pin safety, SAR9 SC also possesses trigger safety.

SAR9 GEN2

Sarsilmaz takes its expertise in semi-automatic pistol design one step further with the SAR9 GEN2. This new member of the SAR9 family includes innovations such as a lightened trigger, a slot on the slide that allows the use of the red dot sights, and a detachable slot cover. These features, which offer different options to the user, make it possible to shoot with the classic sight and front sight set, as well as the use of optical sights. Having an ergonomic and aesthetic design, the SAR9 Gen2 is manufactured from high-strength 7075 T6 series aluminum, which is also used in aviation industry. The trigger which provides a much more accurate shot, was designed in a flat structure. In the GEN2 version of the SAR9, the magazine capacity has also been increased to 19 rounds.

SINGLE ACTION TRIGGER SYSTEM

It is a system that works by releasing the installed trigger system by the force applied to the trigger of the firearm.

DOUBLE ACTION TRIGGER SYSTEM

It is a system that works by first cocking and then releasing the system at rest thanks to the force applied to the fire system trigger

SARSILMAZ K12 SPORT, K12 SPORT X and SAR 7/24 operates according to the single action principle, all other steel models work according to the double action principle.

SAR 7/24

Sarsilmaz's newest pistol series SAR 7/24, a product of advanced engineering, is the choice of those who want to feel safe at any time and under any circumstances with its clear, decisive, and professional design approach. The flat trigger design with a single-action trigger system and adjustable reset distance distinguish SAR 7/24 from its competitors with the advantages of faster first shots, practical use, and safe transportation. The body design specially developed for the SAR 7/24 is complemented by body lines that maximize ergonomic grip both during gripping and shooting. Another distinctive feature of the SAR 7/24 is the vertical trigger guard that facilitates ergonomic grip. The SAR 7/24, fed with a double stack 17-round capacity magazine, has a barrel bushing mounted on the cover assembly, which improves the feel of the barrier shot and provides an advantage in rapid firing. There is also a sports model and a compact model, SAR 7/24 offers the user the highest level of shooting performance with its ergonomic structure that takes into account the weight balance factor suitable for the “full size” class.

The image shows two Sarsilmaz SR 38 revolvers. One is in the foreground, angled towards the left, showing its black textured grip, silver frame, and barrel. The other is in the background, angled towards the right. Both are resting on a dark, mottled, and slightly rusted metal surface. The lighting is dramatic, highlighting the metallic textures and the ergonomic design of the guns.

REVOLVER

Revolvers are among the best options for those who like simplicity but cannot give up functionality. With three different barrel lengths, Sarsilmaz's revolver model SR 38 offers perfect examples in which tradition and technology meet.

SR38 6 INCH

Legendary revolver SR 38 offers aesthetics of the classic together with elegance of innovation with its structure comprised of alloy forged steel frame, barrel and cylinder. Offering a comfortable and reliable use with half cock, adjustable rear sight and changeable front sight, SR 38 can be used with .357 magnum and .38 bullets.

Semi-Automatic Shotguns

Manufactured by keeping different needs and preferences in mind, Sarsilmaz semi-automatic shotguns contain walnut or polymer butt and fore-end alternatives. Versions of Magic, Vertu, SA-W 700, SA-X 700 and Franchi models deliver necessary performance for comfortable and balanced shooting by perfectly adapting to challenging hunting conditions.

Pump-Action Shotguns

Developed by Sarsilmaz for shooting competitions and hunting, pump-action shotguns offer a wide range of preferences with their high resistance alloy metal accessories, polymer butt and fore-end alternatives. While automatic safety lever and hand safety offer a safe use in all pump-action shotguns, ergonomic shoulder pad prioritizes user's comfort. Various barrel lengths, cartridge capacities and front sight alternatives allow Sarsilmaz Pump-Action Shotgun family to respond all kinds of needs.

Over & Under Shotguns

Having a wide product range, Over & Under shotgun range offers different alternatives to both hunters and shooting competition enthusiasts. While prioritizing users' needs and preferences, over & under shotguns that combine technology, performance and aesthetics maximize easy use with their sensitive ejector mechanisms, safety with their automatic safety mechanisms that successfully passed SAAMI tests and efficiency with their special alloy steel barrels.

MAGIC

Having been one of the most preferred shotguns of Sarsilmaz by hunters since the beginning of its production, MAGIC draws attention with oil finished walnut butt and fore-end integrated with aesthetic design. Semi-automatic Magic provides high performance especially in long range shootings with its barrel and top rib structure which increase pattern. Having 76-milimeter chamber and 5 cartridge capacity, Magic makes it easier to focus on target with its ergonomic stop button, red fiberoptic front sight that shows perfect results in day and night conditions and its internal choke that offers flexible use. Hunters' favorite MAGIC SLUG offers its users options they need with SPro® internal choke that provides 70 millimeters optimum shot dispersion.

WAR AND HUNTING WEAPONS MUSEUM

It has been open to the public since May 2010. From the Ottoman period flintlock rifles and pistols, the firearms and non-firearms used during the First World War and up to the present are chronologically exhibited. 30 of the 110 weapons presented to the attention of the visitors in the museum are ethnographic works.

Many interesting and valuable weapons can be seen in the museum, from the Ottoman Montenegrin pistol used in the battle of Gallipoli, to the Gatling gun, Bren machine guns, Lighter guns, Browning machine guns, especially used in the Gaza line during the First World War, the MP 18 Berkman machine gun, known as the first machine gun, with side magazine and 32 rounds firing, used in the Great Offensive.
